Patents Showing: View as: Patents **1 - 10** on **generating thread while validating xml document.** (0.01 seconds)

Sort by relevance | [Sort by date \(new first\)](#) | [Sort by date \(old first\)](#)

[APPLICATION] [System and method for providing post hoc access to legacy applications and data](#)

US Pat. 11342767 - Filed Jan 30, 2006 -

The use of DTDs or schemas ensures that the client does not need to perform any error-checking **while** processing the **XML document**. [0067] In cases where the ...

[APPLICATION] [System and method for providing post hoc access to legacy applications and data](#)

US Pat. 9753855 - Filed Jan 3, 2001

The use of DTDs or schemas ensures that the client does not need to perform any error-checking **while** processing the **XML document**. [0068] In cases where the ...

[APPLICATION] [Digital rights management in a distributed network](#)

US Pat. 11148899 - Filed Jun 9, 2005

Typically, this will be done in the background **while** the end-user stays on the ... video typically will require generation of a DRM VOD **XML** file (sometimes ...

[APPLICATION] [Method and system for processing queries requiring coordinated access to ...](#)

US Pat. 10112208 - Filed Mar 29, 2002

As each **thread** needs to access a database, it requests a connection from a ... request handler is configured to receive a **document**, such as an **XML document**, ...

[APPLICATION] [Complex syntax validation and business logic validation rules, using VAXs ...](#)

US Pat. 11079661 - Filed Mar 14, 2005 - Microsoft Corporation

Document translation is a complex process involving conversion of source data that can be in a non-**XML** format to an **XML** format. In addition to performing ...

[APPLICATION] [System and method for conducting a secure interactive communication session](#)

US Pat. 9912855 - Filed Jul 25, 2001 - Storymail, Inc.

While the story interaction is described in the context of filling out a form, ... on the **thread** in which the input, data, or commands are detected. ...

[APPLICATION] [System and method for conducting a secure response communication session](#)

US Pat. 9912901 - Filed Jul 25, 2001 - Storymail, Inc.

While the story interaction is described in the context of filling out a form, ... on the **thread** in which the input, data, or commands are detected. ...

[APPLICATION] [Method and system for **generating** and employing a generic object access model](#)

US Pat. 11413798 - Filed Apr 28, 2006 -

The invoker may not be **thread** safe, which means a single invoker may not be used ... Further, this composes an **xml** identifier to be used to name **xml** nodes, ...

[APPLICATION] [Method and system for **generating** and employing a dynamic web services ...](#)

US Pat. 11413789 - Filed Apr 28, 2006 -

The invoker may not be **thread** safe, which means a single invoker may not be ...

QName may be used to denote fully qualified **XML** names, which includes an **xml** ...

[APPLICATION] Hardware architecture, operating system and network transport neutral system ...

US Pat. 9912716 - Filed Jul 25, 2001 - Storymail, Inc.

123 further files during streaming, format **XML** (or **XML** extensions); ...

This functions executes all the threads once in order, until each **thread** gives up ...

Stay up to date on these results using the patents RSS feed on **generating thread while validating xml document**.
